Sterling Heights, MI 48314

Dear KTISIS Recruiter,

I am connecting with you for the position of Intern Computer Programmer that is posted on the Oakland University Handshake website. As an OU Senior pursuing a degree in Computer Science, I think pursuing this position will help me grow my skills as a computer programmer and contribute them to your team. My schooling has given me experience in C++ and Java programming languages, database creation and management with MySQL, and project management through extracurricular activities and Team Projects.

Give skills and accomplishments

- **Project Management** - While being the VP of the MCC Game Developers Club, I helped breakdown project tasks, plan iterations/sprints, delegate tasks, and implement designs.
- **Programming Education** – Because of my education path, I have learned a lot about Java and Object Oriented Programming. Other programming languages I have experience with thanks to my education are Python, C, C++, and Bash. I have also taught myself how to program with C# in relation to Unity 3D thanks to my time with the previously mentioned MCC Game Dev Club.
- **Task/Time Management** – I like to look all that I have to do and plan out how, when and in what order I should get them done. If something pops up, I work that into my current plan based on importance and time potentially spent.
- **Video Creation** – As a personal hobby, I create videos on YouTube that range from improvisational “Let’s Play”, fan-made projects (trailer/music videos), and analytical/critical video essays.

Sincerely,

*Fabian James LeFevre*
